At Miracle Dental Center in Feasterville, the journey to a confident smile is a blend of cutting-edge technology, extensive expertise, and deeply rooted compassion. With services ranging from general dentistry to facial aesthetics, this family-led practice offers patients the tools to reclaim their confidence, and their lives.

Technology with Purpose

Alex Tyurin, D.D.S., FICOI, could easily spend hours discussing the sophisticated technology embraced at Miracle Dental Center. But he prefers to talk about *why* it matters.

“We’ve reached a point where we have all the bells and whistles—modern workflows, digital advancements, and the newest tech-

From the front desk to the dental chair, the team at Miracle Dental Center strives to make patients feel safe, heard, and cared for.

The practice uses technology such as computed tomography, facial scanners, intraoral scanners, and digital treatment planning software to increase diagnostic accuracy and predictability.

nologies,” Dr. Tyurin says. “But people don’t care about the tech itself. They care that it improves their lives.”

The practice leverages tools like computed tomography (CT), facial scanners, intraoral scanners, and digital treatment planning software to increase diagnostic accuracy and predictability.

“We treat the patient, not the mouth,” Dr. Tyurin adds. “We’re not in the business of selling teeth; we’re restoring confidence and humanity, with as little disruption as possible.”

A Family-Led Practice of Excellence

Miracle Dental Center is led by a mother-and-son team. Irina Frolov, D.D.S., the founder, and her son, Dr. Tyurin, both earned their degrees from the New York University College of Dentistry. Since then, both have pursued advanced training to expand their capabilities.

A pioneer in facial aesthetics, Dr. Frolov is certified in treatments including dermal fillers and botulinum toxin (Botox) injections. She offers minimally invasive options that

complement dental treatments to enhance patients’ appearance and confidence.

As a fellow of the International Congress of Oral Implantologists, Dr. Tyurin specializes in advanced dental implant procedures that help even the most challenging cases. Some patients come in after being told by other dentists that nothing could be done, but Miracle Dental Center offers hope.

“Some patients come to us after seeing seven or eight other dentists who told them there’s no hope,” says Dr. Tyurin. “We give them back their sense of self, often in just days or weeks. Nobody should live with a compromised smile, and no one should have to live with their teeth in a cup. These treatments can change lives.”

Faster, Smarter Full-Mouth Rehabilitation

Thanks to advancements in techniques and technology, treatments that once took months, or even years, can now be completed in a fraction of the time. Most full-mouth rehabilitations are now completed in a matter of weeks, a timeline that was unheard of just a few years ago.

“We help people who have lost hope find their smile again, quickly and safely,” Dr. Tyurin says.

A Culture of Compassion and Growth

The commitment to patient care extends beyond clinical expertise. From the front desk to the dental chair, the team at Miracle Dental Center strives to make patients feel safe, heard, and cared for.

To further support patients with dental anxiety, the practice is preparing to launch IV sedation services, a major step in accommodating those with deep-seated fears of dental procedures.

Dr. Tyurin adds, “We’re not just upgrading equipment or adding in procedures; we’re optimizing the entire experience by integrating comfort and predictability.”

Smiles That Change Lives

At its core, Miracle Dental Center is about more than dental work; it’s about restoring confidence and dignity. Whether it’s through a routine cleaning, a complex implant surgery, or a subtle aesthetic enhancement, the goal remains the same: empowering people to feel good about themselves.

“We help people feel proud of who they are, inside and out.” ■
