Where Advanced Dentistry Meets Personalized Care

Miracle Dental Center, now celebrating its five-year anniversary, restores patients' confidence and dignity by pairing cutting-edge technology with a genuine human connection.

The world has changed a lot in the five years since Irina Frolov, D.D.S., opened Miracle Dental Center in Feasterville. What began as a vision to offer an exceptional dental experience has evolved into a modern, comprehensive practice where advanced technology, sophisticated dentistry, and attentive care converge under one roof.

Besides doubling the clinical team with the 2022 addition of Alex Tyurin, D.D.S., FICOI, Miracle Dental Center has completely digitized its workflow—computed tomography, facial scanners, intraoral scanners, and digital treatment-planning software—to enhance patient care and deliver more predictable outcomes. The practice's evolution has been driven by a simple yet profound philosophy, according to Dr. Frolov.

“Every patient deserves the highest level of care in an environment where they feel comfortable, respected, and truly cared for,” she says. “Our office was designed to feel different from a traditional dental practice. It is bright, elegant, welcoming, and equipped with modern technology that allows us to provide precise diagnoses and treatment while making the patient experience as relaxing as possible.”

Miracle Dental Center offers comprehensive dentistry for adults, including general and cosmetic dentistry, dental implants, full-mouth rehabilitations, and teeth-in-one-day solutions. While both doctors excel at creating beautiful, healthy smiles, each has a specific area of specialty; Dr. Tyurin, who is a fellow of the International Congress of Oral Implantologists, specializes in implant placement and other advanced surgical procedures, and Dr. Frolov has extensive experience in comprehensive and cosmetic dentistry, with a particular focus on smile restoration and aesthetic treatments. Her approach combines restorative and cosmetic dentistry with minimally invasive facial aesthetic treatments including

Botox and dermal fillers, when appropriate, to create natural, harmonious results.

“Our approach allows us to look at the entire patient and create a treatment plan designed around their individual needs, goals, and lifestyle,” she adds. “Technology has become an essential part of modern dentistry, but technology is only one part of excellent dentistry.”

Patients benefit from the skill and compassion of Drs. Frolov and Tyurin and their team. The practice aspires to build a long-term relationship with each patient. While most patients hail from surrounding communities in Bucks, Montgomery, and Philadelphia counties, some travel to the office from different states—even different countries. No matter where patients come from, the doctors consider patients’ trust “the greatest compliment we can receive.”

Miracle Dental Center recently started offering IV sedation for in-depth surgical procedures such as dental implants. That said, mild sedation can make even simple procedures, such as fillings, extractions, and root canals, more comfortable for patients who have dental anxiety, phobias, or sensitivity to pressure.

“Everything we do here is designed to provide the best and most comfortable experience for all patients, and that has gone a long way to help us build long-term relationships with the community,” says Dr. Tyurin. “We want to see patients from day one and be their dentist for as long as we can.”

Drs. Frolov and Tyurin share connections that go much deeper than most workplace relationships. They are not only colleagues, but also family; Dr. Frolov is Dr. Tyurin’s mother. Both earned their degrees from the same institution, New York University College of Dentistry. And both share the same approach to patient care—treat the whole patient, not the tooth—and a commitment to continual self-improvement.

“The biggest thing is that we just want to keep improving,” he adds. “As a practice, our goal is to get better and better every

day. We’re very good at what we do, but there’s always more to achieve. Even small changes that are made over the course of weeks and months can add up to a very big impact—for us as clinicians, for our team, and for our patients.”

While much has changed since Miracle Dental Center started its journey in Bucks County five years ago, some things have stayed the same—namely, the team’s passion for serving the community. If anything, Dr. Frolov says, the commitment has grown stronger.

“We continue to learn, invest in technology, improve our techniques, and raise our own standards because we believe that

excellent dentistry should never stand still,” she adds. “Our vision for the future is to continue providing our community with the very best in modern dentistry, while maintaining something technology can never replace: a genuine human connection.” ■
